

## Hipsburn Primary School's Maths Mastery Showcase

On Wednesday 20<sup>th</sup> June we invited the parents into school for our first maths mastery showcase. This was a brilliant opportunity for the children to demonstrate their knowledge and skills and for parents to see how maths is taught at Hipsburn.

There was a real buzz at the showcase. The children thoroughly enjoyed themselves and the parents were impressed by how confident and engaged our pupils are with maths.

Reception and Year 1 showed the visitors how to use resources such as Numicon and Base 10.

Year 2 showed parents how to use representations such as part-part-whole models.

Year 3 and 4 demonstrated their problem solving skills.

Year 5 supported the parents to have a go themselves...

...and Year 6 challenged the parents to some SATs paper questions!
